

EXPT NO : 06	INSTALLATION OF APACHE TOMCAT SERVER
DATE: 13.02.2025	

AIM:

To install apache tomcat server in windows.

STEP 1 :

Download Tomcat for Windows.

STEP 2 :

Open the downloaded **Windows Service Installer** file to start the installation process. In the Tomcat Setup welcome screen, click **Next** to proceed.

STEP 3 :

Read the License Agreement and if you agree to the terms, click **I Agree** to proceed to the next step.

STEP 4 :

In the Tomcat component selection screen, choose **Full** in the dropdown menu to ensure the wizard installs the Tomcat Host Manager and Servlet and JSP examples web applications. Alternatively, keep the default **Normal** installation type and click **Next**.

STEP 5 :

The next step configures the Tomcat server. For instance, enter the **Administrator login credentials** or choose a different **connection port**. When finished, click **Next** to proceed to the next step.

STEP 6 :

The next step requires you to enter the full path to the JRE directory on your system. The wizard auto-completes this if you have previously **set up the Java environment variables**. Click **Next** to proceed to the next step.

STEP 7 :

Choose the Tomcat server install location or keep the default one and click **Install**.

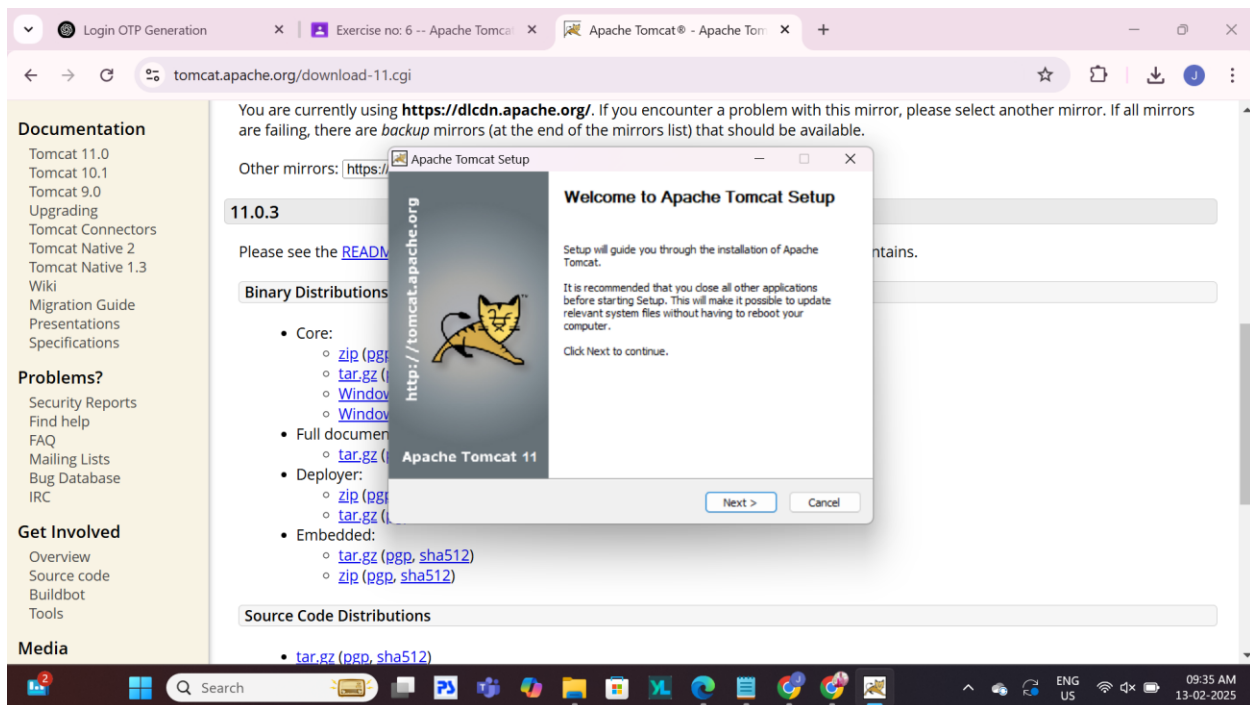

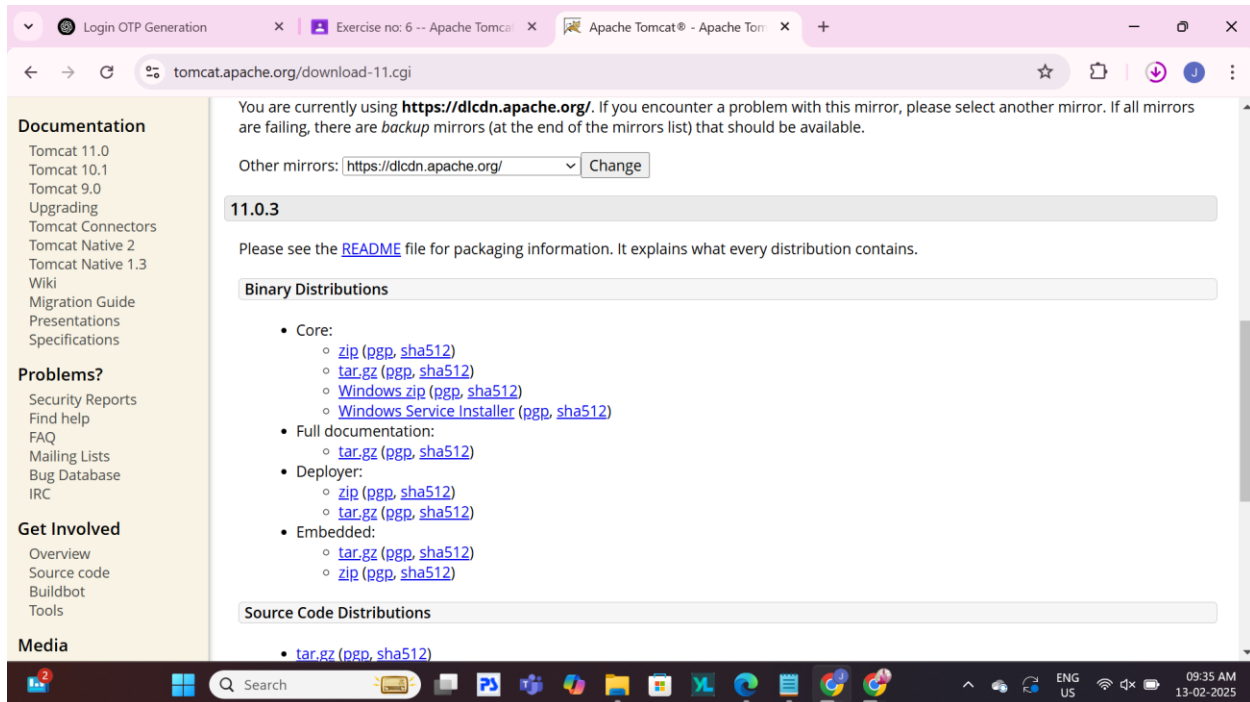

STEP 8 :

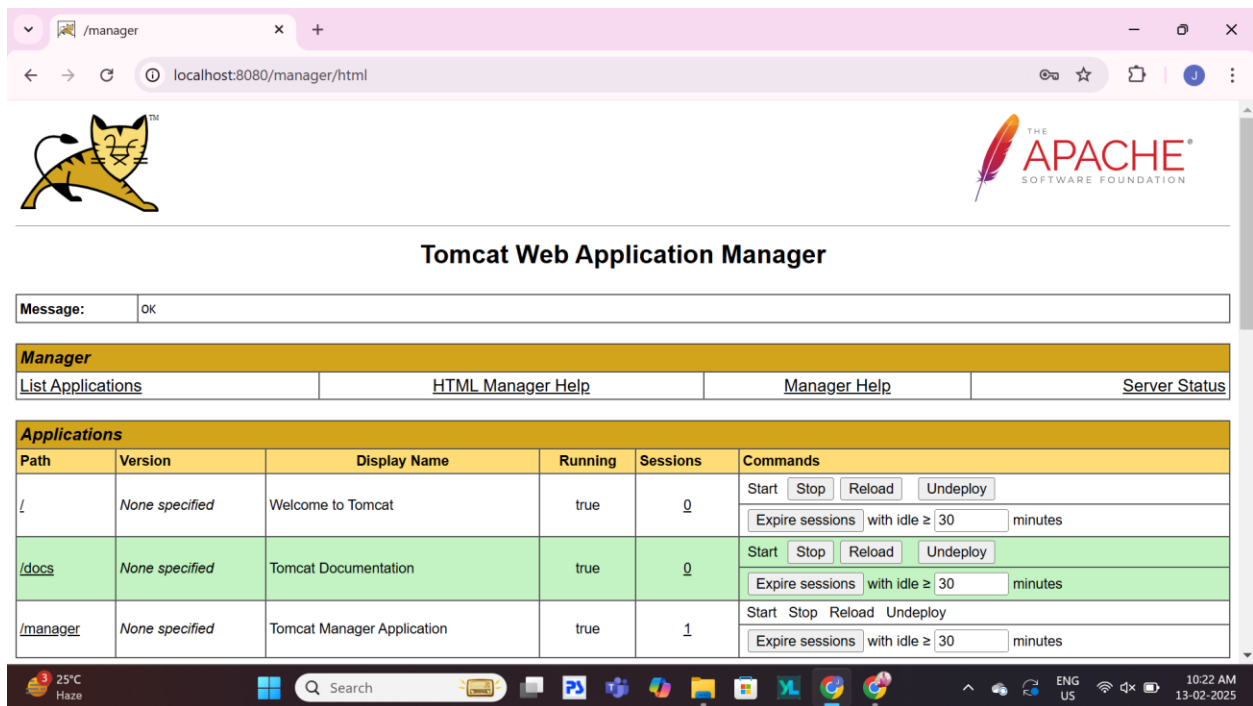

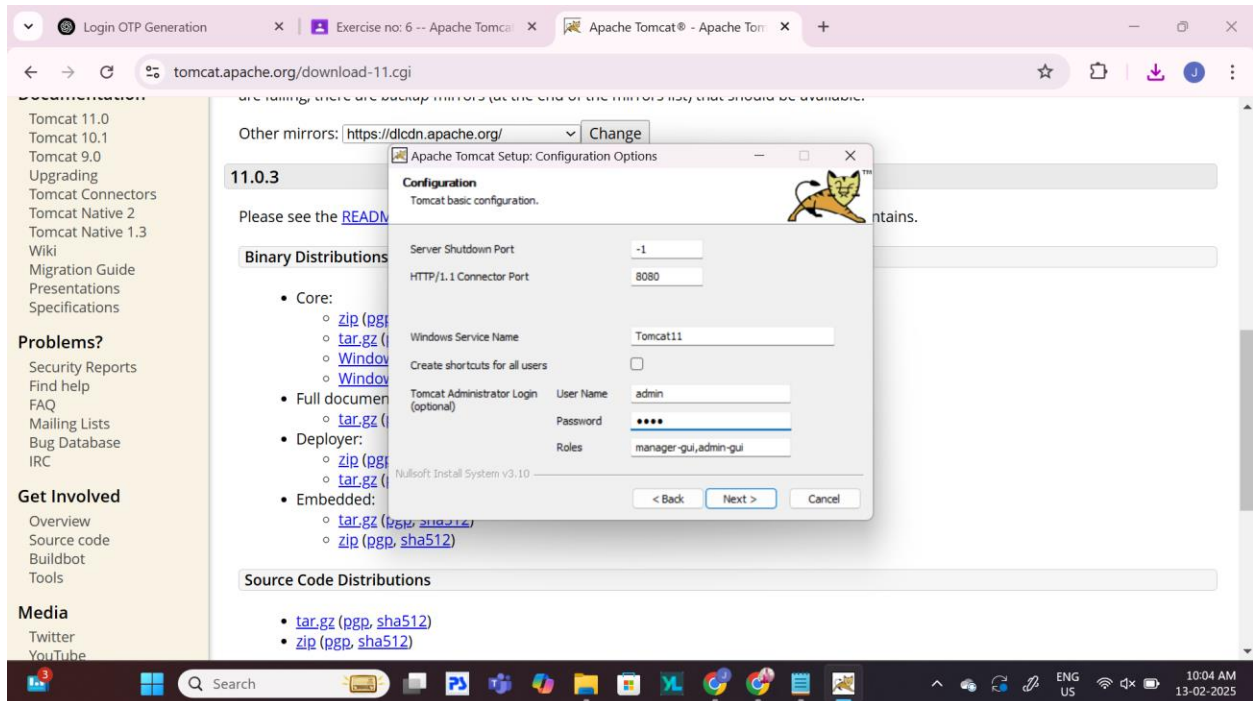

Check the **Run Apache Tomcat** box to start the service after the installation finishes. Optionally, check the **Show Readme** box to see the Readme file. To complete the installation, click **Finish**.

STEP 9 :

A popup window appears that starts the Tomcat service. After the process completes, the window closes automatically. The Apache Tomcat web server is now successfully installed.

OUTPUT :

RESULT:

Thus, the apache tomcat server is successfully installed in windows.
